attached plants (large algae, eel-grass, etc.)
phytoplankton (diatoms, flagellates, etc.)
zoöplankton (mainly herbivores)
plankton-feeding fishes, whales
carnivores
euphotic zone
dark zone
littoral and sublittoral benthic animals
midwater bacteria
midwater bacteria
middepth zoöplankton
middepth fishes
deep zoöplankton
deep fishes
deep benthic animals
bottom bacteria
solar energy
decay
direct food
detritus food
return of plant nutrients
decomposers
trophic levels
